Subject: FW: ULEP Follow-up - Site Enhancements (Mapping Module/DB Integration)

---

Hi Brenda/Lisa –

I emailed Brad and Raj as my follow-up action item to our discussion regarding the DB-to-DB Synchronization and more specifically the DB Integration task so that the Analytical DB (SQL Server) and Middle-Tier (SDE Server) are both integrated and talking to each other. This would be essential to providing dynamic query/mapping capability within the ULEP Web Portal via their mapping module.

As we discussed at our last meeting, this DB functionality was “not working” within the ULEP Web Portal and Weston/Brad indicated that there were “circumstances that prevented them from getting this done”. However, he did say it would be included in the next deployment for site enhancements; I forwarded that email to you both after our call last week. Can you confirm if your latest \$30K includes this site enhancement fix since this was brought up at the 1<sup>st</sup> and 2<sup>nd</sup> demo’s of the portal.

I’ve attached the notes from the meeting last week and wanted to confirm date/time for our next ULEP Status Call w/Key Point of Contacts – February 10<sup>th</sup> or 11<sup>th</sup> ?

Thank you,  
Kaleo

**From:** Kaleo Paderes [mailto:kpaderes@innovateteam.com]  
**Sent:** Tuesday, February 01, 2011 11:58 AM  
**To:** 'Morgan, Bradley'; 'Dutt, Rajendra (Raj)'  
**Cc:** 'Henley.Cheryl@epamail.epa.gov'; 'Jessica Zichichi'; 'Bonds, Melissa'; Scott Stollman (stollman.scott@epamail.epa.gov); 'Zenkin.Svetlana@epamail.epa.gov'  
**Subject:** RE: ULEP Follow-up - Site Enhancements (Use Case Discussion - Mapping Module/DB Integration)

Hi Brad/Raj,  
Thank you for your continued work on the ULEP Web Portal and I have a few follow-up items to discuss with you today per our meeting with Region 6 last week.

Aside from the overall DB-to-DB Synchronization from Weston to Region 9, we were also concerned about the DB integration task we discussed in our 01/21/2011 email below. Our question was if the DB integration would provide the **ability/function to query for analytical data and returning the analytical results dynamically and spatially via the MapDotNet module within the portal?** Your last email indicated that this would be done in the next deployment since "circumstances have prevented that from happening" in this round of site enhancements.

Since Region 6 has approved of the task order to move forward on the final round of site enhancements, can you let us know when you/your team will be available to outline when the DB integration for the Analytical and Middle-Tier data will be completed? This would be important since we would want to ensure that the DB-to-DB Synchronization from Weston to Region 9 also recognizes and replicates the DB integration of the Analytical and Middle-Tier data, thereby providing **ability/function to query for analytical data/results dynamically and spatially via the MapDotNet module within the ULEP Web Portal.**

Presently, the MapDotNet module (Middle-Tier Data) works independently of the Analytical Database (SQL); *Users will need to have the capability to dynamically query analytical results/attributes through the MapDotNet module interface within the portal.* This would be an important key function for users of the ULEP Web Portal across Region 9, Region 6, NMED and MMD.

We included this discussion as part of the site enhancements/use case scenarios during the 2<sup>nd</sup> demo of the ULEP Web Portal. I'm available at 1PM PST (3PM CST) to discuss or we can reschedule when you both are available this week.

Thank you,  
Kaleo

**Subject:** RE: ULEP Follow-up - Site Enhancements (Use Case Discussion - Mapping Module)

Hi Brad/Raj,

I thought I'd message you separately from the Response Manager email to inform you about our meeting next week with Region 6 (Brenda Cook) on Wed 01/26. I look forward to that meeting and kindly let me know if you need us to resend what Scott Stollman has sent you per Use Case Scenarios.

On the GeoSpatial front, we did have a specific question related to the ULEP Web Portal and **its ability/function to query for analytical data and returning the results dynamically via the MapDotNet module within the portal**. This use case scenario being that the ULEP Web Portal would serve as not only a central access for the analytical database, but as explained provide a dynamic map of the analytical data points/results and attributes through the map module interface; this would be an important function for the ULEP Web Portal.

Raj has provided us with the Middle-Tier data/MXD file and we would need to also discuss those details to ensure DB synchronization across to Region 9 and understand how that relates to the analytical database updates.

Thank you and best regards,  
Kaleo

Subject: ULEP User list

---

Hey Brenda, Lisa,

I have all the ULEP users with usernames and passwords in the attached spreadsheet. Please review quickly and if you are o.k. with it we will send out emails to every user with their credentials. The ones that are highlighted are new additions after our call on 11/3/10 per the emails I received. Let me know if I have missed anyone.

Just as an FYI – the security of the system is such that we can't see the passwords so we can only reset them. So everyone has new pw's that match this email. I will be checking all the user names and passwords to ensure I can access the site before sending them out.

Thanks,

**Brad Morgan**

**Subject:** RE: Data Layers loaded to ULEP - Weston SDE/GIS Data Layers Reviewed

Kaleo,

I have attached two files to this email:

***SanMateo\_MiddleTier.pdf***

This diagram of overall ULEP project data organization was created in Feb 2010. It represents the design for ULEP implementation; which in overall still holds true.

***NN\_Database\_ContentsUpdate\_WestonFinal\_121410rd.xlsx***

Updated excel list with ULEP Middle Tier info updated. The number of data layers (156) did not include some layers that were listed as a single entry. I have updated the list with additional layer names. Have a look at it closely and let me know if I still missed some data.

Thanks

**Subject:** Re: Data Layers loaded to ULEP - Weston SDE/GIS Data Layers Reviewed

Thank you Raj for the late phone call this evening. Yes, let's have a follow-up call next week after I have received/reviewed your updated files (per data catalog list and MSD diagram overview). We can probably outline/organize which of the 156 layers will be related in our "use case scenarios" for EPA Region 9 and others. Also, please feel free to send me your historical notes with respect to the TerraSpectra/Navajo/AUM data from Region 9.

Have a wonderful holiday weekend,

Kaleo

**Subject:** Re: Data Layers loaded to ULEP - Weston SDE/GIS Data Layers Reviewed

Good evening Raj,

Can we talk tomorrow 12/23 Thurs anytime before 5pm? Brad indicated that you would be able to answer our questions below and I am also available next week Mon 12/27 - Wed 12/29 if tomorrow doesn't work for you. Thank you in advance!

1. Does the MXD directly correspond to the excel file you sent per 156 SDE data layers? What are your thoughts for Map Service Definition (MSD) in organizing how we access the 156 data layers? Since replication can be an issue for 156 SDE layers via MSD, should we discuss how best to group the layers that will be regularly edited by R9 and other users (i.e. NMED)?

2. From the Data Catalog excel file you provided (NN\_Database\_ContentsUpdate\_WestonFinal\_121410.xlsx), there is column called "ULEP SDE/Middle Tier" (which I've highlighted in yellow below) but, there are no "x" marks identifying IF those layers are originally from the Superfund AUM (Abandoned Uranium Mines) dataset that EPA Region 9 sent you initially. Part of our task is to account for those specific layers in relation to the 156 SDE layers.

3. Do you have a simple diagram showing how the MSD service and Analytical Database is currently setup for the ULEP Web Portal/MapDotNet? This may help us to better understand how the data is currently organized and stored. I understand you were going to send this via the ULEP DEMO PowerPoint – Can you kindly forward a copy to the group?

On Wed, Dec 22, 2010 at 11:55 AM, Morgan, Bradley <[Brad.Morgan@westonsolutions.com](mailto:Brad.Morgan@westonsolutions.com)> wrote:  
I am off starting today and next week – but Raj is working and will be able to review and answer your questions.

I am available the second week of January 10<sup>th</sup> – 14<sup>th</sup> any day. I will have to be officially tasked by EPA Region 6 to come, so I suggest that Scott coordinate that with Brenda/Lisa to see if it is o k. for me to come. Once they have tasked me we can set dates/times.

Thanks,

**Brad Morgan**

Subject: RE: Data Layers loaded to ULEP

---

Have a look at attached zipped ArcMap document. You should be able to open this document in ArcGIS and see all SDE data layers from ULEP Middle Tier.

Rename attached file extension to .ZIP before opening.

This Map document includes links to ArcGIS MSD (Map Service Definition) based map service which is faster than regular MXD based map service. If certain data layers need different symbology then email me corresponding layer files.

Replication is currently not activated on this service (it is an MSD based service). There are 156 data layers in SDE. Activating replication for all of them crashes the service. We need more details on what specific layers are expected to be regularly edited, so a streamlined editing capability with edit trail could be implemented. I recommend a solution with separate staging/editing server from production server.

Thanks

**Subject:** Solicitation of Use Case Scenarios

Dear Users

We are taking this opportunity to solicit specific Use Case Scenarios for the ULEP database as we move through the process of addressing specific comments from the beta testing process. I have asked Brad to come up with a template that will help us identify specific functionality needs of the database. I have attached a template and an example of one specific to query across multiple sampling events. I would like to encourage users who have identified something they want the database to be able to do but can't figure out how to make it happen to fill one out. Please respond to email to both Brad and myself by April 30, 2010 so that these requests can be incorporated in the next version of the database (to the extent possible). We will send out a weekly message with a list of the scenarios we have received during the week as an FYI to avoid duplication..

**Subject:** Uranium Legacy Environmental Portal (ULEP)

Hi Brad,

We discussed today at one of our regular Navajo Uranium meetings how we might organize ourselves to start using and regularly updating ULEP. One request was to provide the larger group a demonstration in January to help inform us of the best way for us to move forward. We would need to work out as many of the bugs as possible before that, so we will send you our comments (use-case scenarios) by December 31. Is there any chance you could come to Region 9 for that demonstration? Please let me know.

Also, I am attaching the use-case scenarios we submitted earlier this year. Could you please tell me which of these were implemented?

Thanks,

-- scott

Subject: RE: ULEP Site Screen & Structures Data - Weekly Summary & Action Items (Barton 3 Mine Data Attached)

---

Hi Brad/Melissa,

Thank you for your response updates and here's the weekly summary items/next steps outlined below.

We came across Barton 3 Mine, which has useful site screen and structures data collected (more information than the Mariano Lake Mine). Since the Barton 3 Mine has more data and information collected than the Mariano Lake Mine we discussed previously we think it's a better approach for the DEMO... Can we focus on the Barton 3 Mine data instead?

Please find attached the Barton 3 Mine site screen data and related info for your reference/follow-up. We'd like to attach/link these documents to the mine record in ULEP (I can move ahead on that provided you can get this data into ULEP). I'll be contacting Adam tomorrow to verify which SCRIBE.NET Project ID and subscription info (per Barton 3 Mine) for your team. Please feel free to contact me per mine data coordination/logistics and related to the portal.

We will also discuss with Region 6 tasking approval for remainder of delivery items (per summary list below).

**ULEP Summary Action Items/Status Checks 04/14/2011**

- 1) Firewall Rule Request Form – *Completed*
- 2) Site Screening Data Import – *Completed (Needs to be reviewed/checked by R9)*
- 3) SCRIBE/Structures Data Import – **Not Complete, Focus on Barton 3 Mine (see attached data)**
- 4) Finalize Use Case Scenarios (Query Module) – **Not Complete, Waiting for final update from Weston/Raj/Brad**
- 5) ULEP Middle-Tier Data (All Visible in ULEP Portal) – **Not Complete, Needs to be discussed**

- 6) ULEP Portal Accounts – *Completed*
- 7) ULEP Modules/Menu and Forms/Consistency on Web Page Aesthetics – **In review, R9 will provide screenshots of web page form inconsistencies**
- 8) ULEP Chain of Custody – **In review, R9/R6 to discuss extended ULEP functionality**

Thank you,  
Kaleo

**Subject:** RE: A more complete Status Update - part II

3. We have looked at the CSV files provided which look to be the SCRIBE mapping files associated with the interior monitoring done on Home sites/Structures on the home sites. That is helpful but we still are not 100 percent sure which SCRIBE.NET project to grab data from. Also how to focus this down to Muriano lake area. The SCRIBE.NET project that Adam Ellis pointed out to us on the previous call has not been updated in 2.5 years. If this is the one to use that is o.k. we were just wondering and thought he was going to verify that is the one to use. He seemed to be more comfortable working directly through Region 9 as opposed to working with WESTON on the call. If somebody can ask him to verify the SCRIBE.NET Project ID and subscription info to utilize we can take it from there.

Thanks,

**Brad Morgan**

**Subject:** A more complete Status Update

Kaleo,

Below you will find a more complete status update,

1. Done - Sent to Cheryl this morning in the format that was provided, please let us know if you need more details
2. This is done –
3. Melissa is reviewing the CSV files that were provided, when we initially met with you and Adam Ellis from E&E we talked about having some form of documentation so we understood the way the data was structured. Melissa will be reviewing what was provided and if we have questions we will reach out to you. Again we agreed to focus on the Muriano Lake Area for the demo.
4. This is done and will be deployed before noon central time – Raj will then test it to ensure it is working properly. Raj will update you later today after testing. Again this will give the user the ability to view Sampling Locations on Map from the Grid.
5. I probably want to talk to you more about this one, the original tasking I received from Region 9 was to show the layers that are currently shown in the MapDotNet interface. We actually had a spreadsheet with all the Middle Tier layers listed and Scott and Cheryl when through and checked the ones that would be shown on the MapDotNet interface. Today I am having Raj go through and verify that we did indeed include the appropriate layers per the spreadsheet that was filled in by Region 9. If we were to put every layer on the MapDotNet interface the concern was that it would become confusing for non-GIS users and not as usable.

6. Done – please have anyone reach out to me that needs their PW reset or doesn't think they have an account.

Thanks,

**Brad Morgan**

**Subject:** Re: Pre-Gov't Shutdown/ULEP End of Week Follow-up - ULEP FRR/Use Case Scenarios/Structures Data/Site Screening Data/Coordination

Good morning Brad,

Hope you're having a constructive day despite the looming "gov't shutdown" upon us (or officially midnight tonight). If the shutdown does happen, let's figure out where we are with the remaining action items/tasks deliverables for future task planning purposes (when we do get back to work if we're officially out for a couple of weeks – let's hope not). So if you can today, please provide status check updates of the items I've listed below and let me know if they're completed or in progress. I also pasted in emails/notes for your reference.

ULEP Follow-up Action Items and Task Deliverables

**1. Firewall Rule Request Form (for R9/Weston SQL Server Replication)**

03/27/2011 – Have you kindly sent the completed FRR form to Cheryl Henley per your email below? If not, please do so and kindly cc me for reference/task update.

**From:** Morgan, Bradley [mailto:Brad.Morgan@WestonSolutions.com]

**Subject:** RE: ULEP Status Check and Coordination Items - Follow-up 03/18 Friday

*I received the Site Screening Data from Joe Dafeo earlier this week, we had a call with him yesterday to understand the data better and I will work with Melissa next week to get an area uploaded.*

### 3. **SCRIBE/Structures Data Import (database from START 9/Adam Ellis)**

03/28/2011 – I emailed Structures Zip file data to Raj/Melissa/Brad for import into ULEP. Has the structures data been uploaded into ULEP and/if not what are the road blocks and timing to get this done?

**From:** Kaleo Paderes [<mailto:kpaderes@innovateteam.com>]  
**Sent:** Monday, March 28, 2011 1:23 PM  
**To:** Bonds, Melissa; [raj.dutt@westonsolutions.com](mailto:raj.dutt@westonsolutions.com); [brad.morgan@westonsolutions.com](mailto:brad.morgan@westonsolutions.com)  
**Cc:** [stollman.scott@epamail.epa.gov](mailto:stollman.scott@epamail.epa.gov); [Henley.Cheryl@epamail.epa.gov](mailto:Henley.Cheryl@epamail.epa.gov); [bain.andrew@epamail.epa.gov](mailto:bain.andrew@epamail.epa.gov); [jzichichi@innovateteam.com](mailto:jzichichi@innovateteam.com); [chambers.linda@epamail.epa.gov](mailto:chambers.linda@epamail.epa.gov)  
**Subject:** FW: ULEP Item #2 - SCRIBE Structures Data/CSV Test Files Attached

*Hi Melissa/Raj,  
How was your weekend? Per coordination with Adam last week for Task#2 (per email thread below), please find attached zipped mapping files (SCRIBE uses these to sync the fields that are being imported into SCRIBE with the fields already in SCRIBE).*

*Adam also took the time to give us some added descriptions of what each field is and included some of the actual import files (containing the data being imported into SCRIBE). Please incorporate the attached files into the ULEP portal for review/testing.*

*Let's discuss for feedback or comments when you have imported this data in ULEP and created layers for viewing/access within the MapDotNet module. I'm available anytime today thru Wednesday (out of office on Thurs/Friday); we can discuss items 1, 3 and 4 as well.*

*Thanks in advance,  
Kaleo*

### 4. **Finalize Use Case Scenarios (Query Module – View Queried Data on Map/MapDotNet)**

03/29/2011 – I emailed you about the Query Module and you provided some additional information about the intended initial functionality. Can we go back to the email we circulated back in February and ensure that we understand what the “query module” function provides for users accessing/querying their data via the portal and visually via mapdotnet. The key function we discussed is providing a non-GIS user (i.e. Superfund folks) the ability to **“query specific threshold exceedences (e.g. gamma radiation data) via locations/structures/site screening/wells and view those queried radiation values/labeled results on the map via the**

***MapDotNet/mapping module with the Middle-Tier data layers”.***

**5. ULEP Middle-Tier data**

03/31/2011 – Can you double-check to make sure that all of the Middle-Tier Data is visible within mapping module (via MapDotNet). All of the SDE layers should be visible within ULEP and accessibly visible (giving the user the choice to turn on/off those layers). Last time I checked we still had only a set number of visible Middle-Tier data within the portal, however, all visible within the MXD/ArcGIS.

***All layers that are accessible within ArcGIS/SDE should be mirrored and visibly accessible within ULEP/MapDotNet for non-GIS users.***

**6. ULEP Portal Accounts** – Can you check to make sure that all of the individuals listed current ULEP portal accounts for access?

I understand you probably have a busy day and thanks in advance for sending us your updates. I have a meeting with R9/Cheryl Henley and Scott Stollman this afternoon and would be grateful to get any additional updates from you before then.

Thank you and best regards,  
Kaleo

**Subject:** RE: ULEP Status Check and Coordination Items - Follow-up 03/18 Friday

Good morning Raj/Melissa/Brad et. al,

Hope you all had a festive St. Patrick's celebration yesterday. Thank you again for your continued teamwork on ULEP. As a follow-up, can you kindly provide a quick/brief status update on the following ULEP action items that we discussed 2 weeks ago; We/I need to understand how that affects timing/scheduling for our upcoming R9 ULEP Demo planned for early April or if we need to move the ULEP portal deliverable and ULEP Demo date further out?

ULEP Follow-up Coordination & Task Deliverables

1. Site Screening Data Import (From Joe Defao)
2. SCRIBE/Structures Data Import from START 9/Adam Ellis
3. ULEP Data Layers & Symbolology per Transactional and Middle-Tier data
4. Finalize Use Case Scenarios (Query Module – View Queried Data on Map/MapDotNet)
5. Weston's ULEP Powerpoint Presentation
6. Draft Outline for ULEP R9/Superfund Demo

If you could kindly provide status updates/expected delivery dates on the items above and I will update the calendar for scheduling/task coordination/discussion with Region 9/Scott and Cheryl and Region 6/Lisa and Brenda next week.

Thank you and best regards,

Kaleo

Kaleo,

The attached file identifies all middle tier layers that show up in ULEP Mapping interface.

I will call you to clarify if you need something else.

I prefer Monday afternoon for meeting.

Thanks.

**Subject:** RE: ULEP Data Layers/Symbology Standards - Coord Mtg. Fri 03/11 or Mon 03/14

Hi Raj,

Can you send us your updated NN\_Database\_ContentsUpdate\_WestonFinal spreadsheet per Transactional and Middle-Tier data catalog for ULEP? Per last week's meeting and status call, we had the following Middle-Tier and Symbology action items in preparation for the ULEP Demo in 3 weeks (i.e. R9/ULEP Demo has not yet been confirmed but, we need to get moving forward on these items).

1. Include additional Middle-Tier layers from updated data catalog spreadsheet and make them visible/accessible via the portal. Specify which of the Middle-Tier data layers would need to be "editable" from within the portal. Outline approach and get comment/review by R9/Scott/Cheryl in 2 weeks before ULEP Demo.
2. Standardizing the layer symbols per related EPA symbolsets used on similar projects and provide Scott/Cheryl with some sample layer groups (i.e. Contaminated, Removed, Replaced, etc.) and contaminated wells for the structures data.
3. Outline "dry run" of how the structures and transactional data would be presented visually via the portal and what data layers/groups would need to be created to outline ULEP's key benefits to non-GIS Superfund users.

I've attached the working spreadsheet data catalog for your reference and let me know when you're available to discuss this Friday or next Monday. I'm keeping our ULEP Layer Symbology meeting separate from our ULEP SCRIBE/Structures meeting w/Adam Ellis/Melissa Bonds and meeting for AUM Site Screening Data w/Joe Defao/Brad as separate coordination items.

Please let me know if Friday 03/11 or Monday 03/14 works for you at 9AM PST/11AM Central or 1PM CST/3PM Central.

Thank you,  
Kaleo

Subject: RE: FW: SCRIBE Contact - FOP & Radioactive Structure Assessment Docs

Good morning Mike,

I'm working with EPA Region 9/Scott Stollman/Cheryl Henley and Region 6/Brenda Cook/Lisa Price on the ULEP project and have a timely data gathering/data request for your team.

Scott asked that I contact you in coordinating and obtaining SCRIBE/Structures data for the ULEP portal per Navajo AUM area. I've included Brad Morgan and Melissa Bonds from Weston Solutions on the email since they will be working directly with importing the necessary SCRIBE data into the ULEP portal for use on an upcoming Superfund Demo in early April. I'm tasked to provide data coordination, data review and logistics support for Region 9 per SCRIBE data to Weston.

Please let me know when you or Adam Ellis are available this week (Btw, I worked with Adam back at LFR some 10 years ago). Ideally, we would like to outline the specific data structures/area we are most concerned with and have this data back to Region 9 and Weston by mid-week next week. This will give us

enough lead time to review the data and do some prep work on the data for access and viewing within the ULEP portal.

Let's discuss this at your earliest convenience this week (kindly cc everyone on the email for coordination purposes with Weston being on Central time).

We appreciate your time in advance and look forward to hearing from you.

Thank you and best regards,

Kaleo

Good afternoon Brad and Kris,

We would like to schedule a follow-up conference call with you to determine our strategy plan and coordination for our R9/database synchronization task with Cheryl Henley. There's some things we'd also like to discuss in terms of database access, data inventory (analytical and geospatial), and the ULEP Web Portal/SQL Server administration.

Please let me know what your availability will be for this week or if this week doesn't work, then let's connect early next week. We're approaching the holidays quickly and so it would be great to get some of our ULEP database synchronization & task coordination underway.

I understand you both are on travel with other priority projects and appreciate your follow-up as soon as possible.

Thank you and best regards,  
Kaleo

Hi Lisa

In addition to the issues identified by Region 9, I would also like to have on the agenda--some more basic discussions on the use of the ULEP Portal by all users. Such as use/needs/data ownership/applicability and longevity of the portal.

1. Establishment of ULEP Program/Technical/Leads for all end-users.
2. Projected use of data base by end-users. Weston will provide current usage stats.
3. Status of Use Case Scenarios.
4. Would developing a standardized Data Management Plan and SOPs encourage use of the portal.

Brenda Nixon Cook  
Region 6 NPL Coordinator

---

Lisa & Brenda,

Below are notes that summarize the status of some of the R9 ULEP issues/requests. I thought this would be good to have on hand for tomorrow's call.

1. DB Synchronization –

Weston describes the editable data on the portal as being the “transactional” data layers. These transactional data layers represent the editable database layers (essentially SCRIBE imported data). The Middle-Tier data, separate from the transactional data, was provided to Weston as majority of the GIS data for the portal. Since DB synchronization was funded as part of this deliverable, Region 9 would like to focus the DB synchronization on the transactional data as it represents what is actively being updated on the portal. Alternatively, instead of

having a DB synchronization, Region 9 would be interested in getting a copy of the transactional data as an exported DVD every quarter. Also, if any new GIS data is added to the Middle-Tier by Weston, Region 9 would like the Middle-Tier data exported as a DVD whenever there are updates.

2. ULEP Contract/Weston/Region 6 –

Discussion on understanding what Weston is contracted to provide under their contract terms as part of the deliverable for the ULEP Web Portal. Andy will be talking with Jeff Inglis to get some historical knowledge on the contract for further clarification. Cheryl and Scott to request a copy of the contract from Region 6 for historical reference.

3. ULEP Mapping Module –

Discussion on how the ULEP Web Portal should work in regards to querying and viewing data points/results within the ULEP Web Portal mapping module (MapDotNet). Based on Weston's description, any user will have the capability in "querying a well or location, and then view their queried data location/results via the mapping module along with the Middle-Tier data layers". Region 9 would like clarification and confirm this functionality is being fixed since it is still not working on the portal. It would be a key function for any user to query the database and view their queried results/point layers within the map module along with the Middle-Tier data for reference.

4. SCRIBE Data Discussion/Training –

Region 9 recognizes the adoption of SCRIBE data as the default database format used for ULEP and was interested in looking at ways to make the use of SCRIBE more user friendly from outside users since NMED and MMD do not use SCRIBE on a regular basis. Since our EPA Region 9 field personnel use RAT (Radiologic Assessment Tool) to collect data in the SCRIBE format, it would be beneficial to better understand that process and its procedures. Region 9 would like to formulate a strategy to address some type of training for SCRIBE, whether it is for general consumption or technical for specific ULEP users entering and updating data on the portal.

5. ULEP Data Workplan & SOP –

Region 9 would like to get a copy of the DRAFT workplan that Weston has put together for the ULEP Web Portal. It is not confirmed if a workplan or SOP exists, although it would be crucial to have as a roadmap for users of the system. Region 9 would like to see the workplan/PowerPoint presentation from Weston, if available, and will bring this up to Brenda at the 02/10/2011 meeting. Cheryl recommended that R9/Kaleo can start to DRAFT Workplan/SOP as a starting point if Weston hasn't done anything substantial.

6. ULEP Layers Symbolization –

Scott provided constructive review (look, feel, and definitions) of the symbols used in the R9 Navajo AUM map and points out that the symbols for the structures and well contaminant groups would be very usable for ULEP. Kaleo is working with Linda Chambers on getting the layer files and will create a sample for the Middle-Tier data layers. The final DRAFT symbols will be sent to Weston for update to the ULEP Web Portal pending group review.

Region 9 Use Case Scenarios List/Updates:

1. **Fix Mapping Tool** – In progress/Need status update from Weston
2. **View/Access Well, Mine, Structure data from map** – In progress/Need status update from Weston
3. **Upload Weston Navajo Mine Screen Data** – Brad to contact Joe Defao to coordinate Navajo Site Screen data upload
4. **Clean Duplicate Records** – In progress/Pending Data Workplan & SOP Discussion (*Begin discussions for Data WorkPlan and SOP for users across regions and agencies. Region 9/Kaleo can help to start drafting out Data Work Plan/SOP*)
5. **Use of Multiple ID Numbers and Aliases for Mines and Wells** – 02/07/2011 Completed per Weston
6. **Change name of “Properties” module** – 02/07/2011 Completed per Weston
7. **Add Region 9 Navajo well sampling data** – 02/07/2011 Completed per Weston
8. **Include name of source datafile for each record** – Pending Task Approval/Weston sent quote/hrs. to discuss at 02/10/2011 meeting
9. **Chain of Custody/Audit Trail** – Pending Task Approval with Region 6/Weston sent quote/hrs. to discuss at 02/10/2011 meeting
10. **Default Mapping Settings** – 02/07/2011 Completed per Weston
11. **Ensure “Source” Column appears in each module** – In Progress per Weston/Melissa will be updating the group on 02/10/2011

Also, here is a brief description we put together of what the Middle Tier module should offers us for anyone who has questions about it:

*The Middle Tier module provides value to any non-GIS user to take a simple ULEP query for wells, mines, properties, locations, etc and map the results, utilizing the Middle-Tier data layers for reference, reporting, and assessment needs. In addition, many basic fundamental geospatial analyses can be performed and visualized quickly and efficiently within ULEP. For example, a user could map all mines with radiation readings over a particular threshold, and then overlay the Middle-Tier data layers to provide the necessary context and reference to their analysis. Without the Middle Tier, ULEP-generated maps would only include the sampling point data with basic map layers such as roads, towns, and possibly terrain. The Middle Tier adds value in allowing any user to create high level maps immediately, without needing to tap GIS expertise or use more sophisticated GIS software, such as ArcGIS, etc. Essentially the Middle-Tier is the key to understanding our environmental data results and impacts within the bigger site picture.*

Thanks,

-- scott

02/10

---

Hi Brenda/Lisa,  
How is your week going so far? Not sure if you have sent out your  
LNotes or  
Outlook meeting invite for our upcoming ULEP/Key POC Status Mtg.  
next week  
Thursday? I noticed that there is a NGA Imagery Briefing meeting  
next week  
also on Thursday 02/10 at 10am - 11am (1-2PM EST) and some of us  
will be on  
that call next week.

I'm forwarding the email thread below for your reference. We could  
schedule  
our ULEP meeting after this NGA Imagery briefing call? Please  
advise.

Thank you and best regards,  
Kaleo

**Subject:** Solicitation of Use Case Scenarios

Dear Users

We are taking this opportunity to solicit specific Use Case Scenarios for the ULEP database as we move through the process of addressing specific comments from the beta testing process. I have asked Brad to come up with a template that will help us identify specific functionality needs of the database. I have attached a template and an example of one specific to query across multiple sampling events. I would like to encourage users who have identified something they want the database to be able to do but can't figure out how to make it happen to fill one out. Please respond to email to both Brad and myself by April 30, 2010 so that these requests can be incorporated in the next version of the database (to the extent possible). We will send out a weekly message with a list of the scenarios we have received during the week as an FYI to avoid duplication..

Subject: Region 9 ULEP Use Case Scenarios - 2nd Round

---

Brad,

Attached are Region 9's second round of Use Case Scenario Forms. In addition to refinements, I have included some bugs that need to be fixed as well. We would like to demo and train our entire Navajo Uranium Team on the system in January, so it would be essential that most of these be addressed before we do so.

Last week I sent you a few emails with input on some of our first round Use Case Scenarios. In one email, I resent you the files with our well sampling results so that you could respond to one of our new Use Case Scenario requests included in this email.

I am also attaching two Excel files related to a Use Case Scenario for Aliases.

Our contractor, Kaleo Paderes, and Cheryl Henley will be in touch with you about refining the Middle Tier so that we can also demo that module in January.

I will be in touch with Region 6 regarding your travel here. The second week of January might work. I just want to make sure we can address most of these issues before the demo. That will probably dictate the timing. Your visit would also be an opportunity to work through any remaining issues in person.

Kaleo,

I apologize for not following up on my action items faster, I got pulled into a crazy emergency deliverable for the Deep Water Horizon (BP) Oil Spill through EPA Region 6. My team and I worked 24 hour operations Tuesday and Wednesday to get something done.

We have now emerged, Raj Dutt is going to be sending an email on accessing the GIS Middle Tier in about 20

minutes. We have tested the ULEP GIS Middle Tier inside of EPA Region 6 and EPA Region 5 firewalls and it worked just fine. Raj will also be looking for some feedback from the Region 9 team in his email.

Please let us know if you have any questions,

Thanks,

**Brad Morgan**

Thank you Brad for the schedule update. Let's schedule our conference call for next week Tuesday 12/14 at 1PM PST (3PM your time) or if you prefer we can also do a morning call on Tues 12/14 at 9AM PST (11AM your time). Kindly confirm with me by this week for scheduling coordination with my team here and let's use the same call-in# from the demo? I'll be sending you our meeting agenda as well.

I look forward to speaking with you and excited to work with your team.

Best regards,

Kaleo

Good afternoon Brad and Kris,

We would like to schedule a follow-up conference call with you to determine our strategy plan and coordination for our R9/database synchronization task with Cheryl Henley. There's some things we'd also like to discuss in terms of database access, data inventory (analytical and geospatial), and the ULEP Web Portal/SQL Server administration.

Please let me know what your availability will be for this week or if this week doesn't work, then let's connect early next week. We're approaching the holidays quickly and so it would be great to get some of our ULEP database synchronization & task coordination underway.

I understand you both are on travel with other priority projects and appreciate your follow-up as soon as possible.

Thank you and best regards,  
Kaleo

Subject: ULEP Use Cases Quote

---

Brenda,

Please see the attached .piz file which you have to download and rename to .zip. Inside you will find all of the use cases and data we received from the ULEP partners. You will also find a file called all use cases.xlsx. This file contains the quote for all of the use cases that were requested with hyperlinks to the Use case they match. If there is no hours or dollars associated with a use case in the spreadsheet it means the functionality already exists or will exist on the next deployment. There was a lot of pdf's and spreadsheets we were given to add to the system which have been included in the .piz file and the addition of this data was included in the quote. They didn't do any use cases they just sent the data and requested it to be added.

Let me know if you have any questions or want us to go through all of this with you.

Thanks,

**Brad Morgan**

**Subject:** Solicitation of Use Case Scenarios

Dear Users

We are taking this opportunity to solicit specific Use Case Scenarios for the ULEP database as we move through the process of addressing specific comments from the beta testing process. I have asked Brad to come up with a template that will help us identify specific functionality needs of the database. I have attached a template and an example of one specific to query across multiple sampling events. I would like to encourage users who have identified something they want the database to be able to do but can't figure out how to make it happen to fill one out. Please respond to email to both Brad and myself by April 30, 2010 so that these requests can be incorporated in the next version of the database (to the extent possible). We will send out a weekly message with a list of the scenarios we have received during the week as an FYI to avoid duplication..

Subject: ULEP Update

---

Kaleo,

I have attached two files to this email,

The first file is a .jpg screenshot of the View Sample Locations on map functionality. You can currently view single Sample Locations on map. You can query for all Uranium Results over 5 for instance and view the single locations on map using existing functionality. This is out on ULEP right now,

Secondly, I have attached the original tracking spreadsheet for the GIS Layers that are in the middle tier and were loaded to ULEP Mapping. Please take a look and give me a call to discuss if you have questions,

Thanks,

**Brad Morgan**

**Subject:** RE: ULEP Data Layers/Symbology Standards - Coord Mtg. Fri 03/11 or Mon 03/14

Hi Raj,

Can you send us your updated NN\_Database\_ContentsUpdate\_WestonFinal spreadsheet per Transactional and Middle-Tier data catalog for ULEP? Per last week's meeting and status call, we had the following Middle-Tier and Symbology action items in preparation for the ULEP Demo in 3 weeks (i.e. R9/ULEP Demo has not yet been confirmed but, we need to get moving forward on these items).

1. Include additional Middle-Tier layers from updated data catalog spreadsheet and make them visible/accessible via the portal. Specify which of the Middle-Tier data layers would need to be "editable" from within the portal. Outline approach and get comment/review by R9/Scott/Cheryl in 2 weeks before ULEP Demo.
2. Standardizing the layer symbols per related EPA symbolsets used on similar projects and provide Scott/Cheryl with some sample layer groups (i.e. Contaminated, Removed, Replaced, etc.) and contaminated wells for the structures data.
3. Outline "dry run" of how the structures and transactional data would be presented visually via the portal and what data layers/groups would need to be created to outline ULEP's key benefits to non-GIS Superfund users.

I've attached the working spreadsheet data catalog for your reference and let me know when you're available to discuss this Friday or next Monday. I'm keeping our ULEP Layer Symbology meeting separate from our ULEP SCRIBE/Structures meeting w/Adam Ellis/Melissa Bonds and meeting for AUM Site Screening Data w/Joe Defao/Brad as separate coordination items.

Please let me know if Friday 03/11 or Monday 03/14 works for you at 9AM PST/11AM Central or 1PM

CST/3PM Central.

Thank you,  
Kaleo

Subject: RE: FW: SCRIBE Contact - FOP & Radioactive Structure Assessment Docs

Good morning Mike,

I'm working with EPA Region 9/Scott Stollman/Cheryl Henley and Region 6/Brenda Cook/Lisa Price on the ULEP project and have a timely data gathering/data request for your team.

Scott asked that I contact you in coordinating and obtaining SCRIBE/Structures data for the ULEP portal per Navajo AUM area. I've included Brad Morgan and Melissa Bonds from Weston Solutions on the email since they will be working directly with importing the necessary SCRIBE data into the ULEP portal for use on an upcoming Superfund Demo in early April. I'm tasked to provide data coordination, data review and logistics support for Region 9 per SCRIBE data to Weston.

Please let me know when you or Adam Ellis are available this week (Btw, I worked with Adam back at LFR some 10 years ago). Ideally, we would like to outline the specific data structures/area we are most concerned with and have this data back to Region 9 and Weston by mid-week next week. This will give us enough lead time to review the data and do some prep work on the data for access and viewing within the ULEP portal.

Let's discuss this at your earliest convenience this week (kindly cc everyone on the email for coordination purposes with Weston being on Central time).

We appreciate your time in advance and look forward to hearing from you.

Thank you and best regards,

Kaleo

Subject: Scanning SOPs

Hi Scott,

Here is one of the more useful documents that could be referred to as our "scanning SOP". Mike - can you let me know if this is the best document to share with R6 summarizing our scanning protocol?

thanks  
harry

Subject: RE: Data Layers loaded to ULEP

---

Have a look at attached zipped ArcMap document. You should be able to open this document in ArcGIS and see all SDE data layers from ULEP Middle Tier.

Rename attached file extension to .ZIP before opening.

This Map document includes links to ArcGIS MSD (Map Service Definition) based map service which is faster than regular MXD based map service. If certain data layers need different symbology then email me corresponding layer files.

Replication is currently not activated on this service (it is an MSD based service). There are 156 data layers in SDE. Activating replication for all of them crashes the service. We need more details on what specific layers are expected to be regularly edited, so a streamlined editing capability with edit trail could be implemented. I recommend a solution with separate staging/editing server from production server.

Thanks

Subject: FW: data to EPA to upload to ULEP

---

Brad:

Attached is data that may already be in ULEP, but in case it is not here it is. The spreadsheet is a compilation of data from various reports listed within the spreadsheet.

David – can you please send the HMC, Bluewater and SMC data if you haven't already?

Jerry

**From:** Bahar, Dana, NMENV  
**Sent:** Wednesday, November 03, 2010 3:58 PM  
**To:** Schoeppner, Jerry, NMENV; Mayerson, David, NMENV  
**Cc:** Ortelli, Angelo, NMENV; Dixon, Earle, NMENV; Pasteris, Allan, NMENV; Morgan, Bradley  
**Subject:** data to EPA to upload to ULEP

Please make sure EPA has all the data from the HMC residential well sampling as well as the Bluewater, San Mateo Creek and Amborsia lake sampling events to upload to ULEP. Also if you have any other data sets (electronic) from the Grants Mining District that you would like to see in ULEP—please forward them ASAP to Brad Morgan at [Brad.Morgan@WestonSolutions.com](mailto:Brad.Morgan@WestonSolutions.com) with a cc to Brenda Cook, Lisa Price and David Mayerson.

Thanks,  
Dana

Subject: URL To check

---

Brenda,

Please click this URL <http://solutions.map.westonproject.net/ulep/mapping/map.aspx>

Login to the ULEP Portal using your normal credentials:

Tell me if you see the ULEP Mapping site come up inside the EPA Firewall it should look like the attached screen shot.

Let me know,

Thanks,
